ACOUSTIC WALL PANELLING.

AUTEX.

OUR ACOUSTIC RANGE

Welcome to Infinity Commercial Furniture's Acoustic Wall Panelling collection, featuring Autex's innovative Groove acoustic range. Crafted with precision and expertise, Groove and Groove Duet are designed to elevate any workspace environment. Utilising Autex's advanced acoustic technology, the collection offers a wide selection of precision-carved patterns, premium finishes and colour options, ensuring seamless integration with any commercial interior.

The Groove collection is meticulously engineered to provide exceptional sound control while introducing depth, texture and visual interest to interior spaces. Groove Duet enhances this versatility with an innovative dual-layer felt overlay, allowing the addition of a second colour to create striking two-tone designs that add warmth and character. Beyond their refined appearance, both ranges are highly durable and fully customisable to suit your project's unique architectural requirements. With an extensive selection of finishes, patterns and colour combinations available, the Groove collection offers endless possibilities for creating inspiring, productive and acoustically comfortable environments.

CARE AND MAINTENANCE.

GENERAL CARE - AVOID THE FOLLOWING CONDITIONS

- Prolonged exposure to direct sunlight
- Any heat source (ie. radiator or heater)
- Sharp objects (buckles, jewellery, keys, pet claws etc)
- Common cleaning materials, paints, solvents, nail varnish, dyes and felt pens

GENERAL CARE - INSTRUCTIONS

- Vacuum furniture regularly with the appropriate attachment
- Do not scrub with a stiff brush
- Allow thorough drying before re-use
- Remove any excess spills from the furniture surface

GENERAL CARE - INSTRUCTIONS

ICF's Acoustic products are extremely durable and require little attention to maintain their good looks. Light vacuuming on a regular basis will prevent dust build up, and most marks can be cleaned with a mild detergent solution followed by rinsing and blotting. Stains should be dealt with according to the chart below. Before carrying out a proposed cleaning method, patch test on a concealed section to ensure it will not affect the adhesive or product. Avoid severe abrasion. Spot clean only. Vacuum to restore pile, but do not use a stiff brush. Autex Acoustic products are designed with good health and hygiene in mind and can be disinfected to prevent germs and pathogens. Autex Acoustics recommends disinfecting product surfaces using isopropanol (isopropyl alcohol) or ethanol diluted to 70 percent with water. Disinfectants containing quaternary ammonium compounds may also be effective

GENERAL CARE - STAIN REMOVAL

ICF recommends that you contact professional cleaning experts if you require further assistance with the cleaning and maintenance of Autex Acoustic products. Always read the directions for use on cleaning product labels to avoid poisoning or injury. Never mix cleaning products, doing so can result in poisonous fumes and serious breathing problems. Ventilate your work area well by opening a window or door and running an exhaust fan. Always wear rubber gloves, safety goggles, and protective clothing when using very strong cleaners

STAIN REMOVAL.

KEY

- A** Mop up excess as soon as possible with a sponge or cloth
- B** Remove surplus with a knife edge or appropriate instrument
- C** Sponge with a solution of carpet shampoo working from well outside the stain in a circular motion towards the centre (this avoids spreading the stain).
Sponge afterwards with clean warm water and mop excess moisture with a clean dry cloth or sponge. Allow to dry, then brush gently with a soft brush. If any stain remains, sponge with a solution of one part household bleach to six parts clear water. Thoroughly rinse after treatment.
- D** Lightly sponge with household dry cleaning fluid and blot. Apply sparingly, as the substance may have an adverse effect on the adhesive
- E** Lubricate the stain with glycerine or petroleum jelly.
- F** Apply nail polish remover. The nail polish remover should not include lanolin or be of a greasy nature.
- G** Sponge with turpentine (or substitute)
- H** Freeze with ice cubes and scrape away while cold
- I** Clean with regular extractive carpet cleaner (if possible)
- J** Use a circular cutter and remove the damaged portion. Re-glue new piece into place

STAIN

ICF'S ACOUSTIC RANGE.

CARBON NEUTRAL

Our acoustic collection is not just functional; they're sustainable. Locally crafted from carbon-neutral acoustic panels and produced in Autex's carbon-neutral manufacturing facilities, our workstation solutions embody our sustainable, smart design philosophy by prioritising material optimisation to minimise waste, ensuring more environmentally conscious products and projects

TELARC REGISTERED - ISO 14001 – ENVIRONMENTAL MANAGEMENT

Autex manufactures under environmental management processes that are ISO certified. This certification gives assurance that we manage any environmental impacts within our operations.

DECLARE - RED LIST FREE

The ingredients in our acoustic timber have been reviewed against the Living Future Challenge Red List and achieve a Third-Party Verified 'Red List Free' status. Products achieve the highest 'LBC Red List Free' status when:

- Ingredients are 100% disclosed and are not found in the Red List
- Products are shown to meet VOC emissions limits

GREEN TAG CERTIFIED

GreenRate is a globally recognised multi-attribute environmental certification that scores products on a range of environmental, health, and social measures. All Autex Acoustics products are certified to achieve GreenRate Level A.

HEALTH PRODUCT DECLARATION

A Health Product Declaration (HPD) is a document that reports the ingredients of a product and the health effects associated with these ingredients. HPDs have been generated for all Autex Acoustics products.
